

StudyFlix Development Report

Date: 04 September 2026

Module: Assignments Feature (V1 Complete)

✓ Major Accomplishments

✓ 1. Assignment Submission Verification

Confirmed that assignment submissions are successfully written to Firestore.

Firestore Collection

submissions
``

Verified Fields

assignmentId
studentId
submittedAt
status
answers

Submission Example

answers
├ 1 → "34"
├ 2 → "45"
└ 3 → "65"

Result

Student
↓
Submit Assignment
↓
Firestore
↓
Document Created Successfully

✓ 2. Submission Debugging

Added logging to verify Firestore document creation.

Confirmation

Saved document ID:
qRukeGJZZbTnOoQTEQRP

Result

Submission Save Confirmed
Firestore Path Verified

✓ 3. Submission Detection System

Implemented:

```
hasSubmitted(  
  assignmentId,  
  studentId  
)
```

Flow

```
Assignment Opens  
↓  
Check Firestore  
↓  
Has Student Submitted?  
↓  
Return True / False
```

✓ 4. Assignment Completion Tracking

Added:

```
hasSubmitted  
``
```

to UI State.

Result

Assignment Screen

↓

Student Submission Detected

↓

UI Updated Automatically

✓ 5. One Submission Rule

Implemented assignment locking after submission.

Before

Continue To Assignment

↔

always visible.

After

Assignment Submitted

shown instead.

Result

Students cannot accidentally resubmit.

✓ 6. Assignment Status System

Implemented assignment statuses.

Supported States

● Active

✓ Submitted

● Closed

Result

Assignment status now updates dynamically based on:

Submission State

+

Due Date

✓ 7. Submission Timestamp

Added:

submittedAt

to UI State.

Result

Students can see:

Submitted:

04 Sep 2026 08:42

✓ 8. Submitted Assignment Tracking

Implemented:

getSubmittedAssignmentIds()

Result

System identifies all assignments previously submitted by the logged-in student.

✓ 9. Assignment List Status Indicators

Assignments screen now displays:

✓ Submitted

or

● Active

for every assignment card.

Benefit

Students can instantly see completed assignments without opening them.

✓ 10. Assignment Progress Summary

Added progress tracking.

Example

2 of 5 Assignments Submitted

Result

Students now have visibility of assignment completion progress.

✓ 11. Submission Review Feature

Created:

AssignmentSubmissionScreen.kt

Added

View Submission

↓

AssignmentSubmissionScreen

Navigation

Screen.AssignmentSubmission

NavGraph Entry

Route Handling

✓ 12. Submission Data Loading

Extended UI State with:

submission: AssignmentSubmission?

Result

Submission review screen can access:

assignmentId
studentId
submittedAt
answers

✓ 13. Question & Answer Review

Implemented:

Assignment Questions
+
Submitted Answers

Result

Students can now review:

Question 1

Actual Question Text

My Answer:
34

instead of only seeing answer values.

✓ 14. Submission Screen Structure

Added:

Top Bar
Back Button
Submission Summary Card
Assignment Title
Submission Date
Submission Status

Layout

My Submission

Assignment Summary

Question 1

Answer

Question 2

Answer

15. Scrollable Submission Review

Implemented vertical scrolling for long submissions.

Result

Unlimited Question Support

Scrollable Answer Review

16. Teacher Marking Foundation

Expanded `AssignmentSubmission` model.

New Fields

`submissionId`
`assignmentTitle`

`studentName`

`startedAt`
`submittedAt`

`isMarked`
`score`
`totalMarks`
`percentage`

`feedback`

`markedBy`
`markedAt`

Result

Database structure is now ready for:

Teacher Review
Assignment Marking
Feedback
Results
Scoring

without future redesign.

✓ 17. Assignment Timer

Implemented countdown timer.

Flow

Continue To Assignment
↓
Timer Starts
↓
Counts Down Every Second

Example

01:00:00
00:59:59
00:59:58
...

Result

Assignments now support timed assessments.

✓ 18. Time Expiry Detection

Implemented:

Timer Reaches 00:00:00
↓

Time Expired Event Triggered

..

Result

Foundation prepared for automatic time-based submission.

19. Submission Confirmation Dialog

Added confirmation dialog before final submission.

New Flow

Submit Assignment

↓

Are You Sure?

↓

Cancel / Submit

Benefit

Prevents accidental submissions.

20. Overdue Assignment Detection

Implemented due-date validation using:

dueDate

Supported Logic

Active Assignment

↓

Can Open

Due Date Passed

↓

Closed

Result

Students cannot access expired assignments.

21. Closed Assignment Locking

Before

Status: Active

[Continue To Assignment]

After

Status: Closed 

[Assignment Closed]

Result

Overdue assignments are automatically locked.

Git Commit Aweh bro 🤓🔥💜

Definitely commit before tomorrow. We made a pretty important architecture improvement today.

Commit Message

```
git add .  
git commit -m "Implement grade-based content filtering for students"  
``
```

Or a more detailed one:

```
git commit -m "Add student grade filtering for assignments, quizzes and videos"
```

Today's Progress

Assignments

-  Injected `FirebaseAuth`
-  Injected `StudentRepository`
-  Loaded current student
-  Retrieved:

`student.grade`
`student.schoolId`

-  Implemented:

`assignment.grade == studentGrade`

-  Verified with Firebase test
-

Quizzes

-  Injected `FirebaseAuth`
-  Injected `StudentRepository`
-  Loaded current student
-  Implemented:

quiz.grade == studentGrade

✓ Verified working

Videos

✓ Added:

val grade: String

to:

VideoEntity
VideoContent

✓ Updated:

toDomain()
toEntity()

✓ Mapped:

grade = doc.getString("grade").orEmpty()

✓ Injected:

FirebaseAuth
StudentRepository

✓ Loaded:

studentGrade

✓ Added video filtering:

video.grade == studentGrade

Tomorrow's First Task

Test Videos thoroughly:

Grade 11 account

↓

Grade 8 videos hidden

↓

Change a video to Grade 11

↓

Video appears

If it works:

Next Targets

Notes filtering

Past Papers filtering

SchoolId filtering

After that, the entire student content system will be following grade restrictions properly.
